

GLOBALFOUNDRIES®

## Environmental, Health and Safety Policy

**GLOBALFOUNDRIES** and its subsidiaries are committed to achieving excellence in our Environmental, Health and Safety (EHS) management systems. We regularly assess our performance and strive for continuous improvement and effective risk management.

***We are customer-focused:*** As an extension of their business, we enable our customers to verify that we meet their expectations for supply chain EHS performance. We will measure and report relevant EHS data to our customers, allowing them to assess and reduce product life-cycle impacts.

We are committed to these principles:

***Beyond Compliance:*** We implement consistent and rigorous EHS policies, standards, management systems, metrics, external reporting, and compliance assurance. These are designed to protect the environment; to protect the safety, health and well-being of our employees, contractors and communities; and to ensure that we meet or exceed regulatory compliance requirements, and other voluntary practices to which we subscribe.

***Sustainable Manufacturing:*** We serve our customers through cost-effective, eco-efficient manufacturing that combines industry-leading productivity with low environmental impact. We employ LEAN methodologies to reduce waste and the consumption of energy, water, chemicals, and materials while protecting the global climate and minimizing all environmental impacts.

***Forward-thinking:*** We integrate EHS considerations and optimization into research and development, manufacturing, and facility design, as well as the selection of equipment and materials. We collaborate with our customers, suppliers, partners, academic and governmental bodies, and industry consortia to drive EHS improvement in semiconductor manufacturing technology.

***Stakeholder Engagement:*** We strive to build and maintain an open and productive dialogue with our stakeholders. We report to our local communities on our performance to our goals and commitments.

We ensure these principles by providing our employees EHS training enabling them to own their roles and responsibilities.
